MASTER'S REPORT

The above-captioned water right claims appeared in the Preliminary Decree for the Missouri River Between Musselshell River and Fort Peck Dam (Basin 40E) issued October 7, 2020. The claims received issue remarks from the Department of Natural Resources and Conservation (DNRC) during its review in preparation of the Preliminary Decree indicating potential legal or factual issues with the claims. The claims were consolidated into Water Court Case 40E-0103-R-2022 to address the issue remarks.

The Water Court requested that Claimant United States Bureau of Land Management (United States) file information or evidence addressing the issue remarks on the claims, and on April 18, 2023, the United States filed its Response, proposing action to resolve the issue remarks. The Response included a Declaration of Melissa Norris, Water Rights Specialist for the United States (Declaration), and supporting documentation. The Response and all documents filed in this case are viewable online via the Water Court's Full Court Enterprise case management system. The issue remarks on each claim, and their resolution, are discussed below.

FINDINGS OF FACT

Reserved Rights Issue Remarks:

1. The claims listed below are wildlife claims owned by the United States, which were filed as federal reserved rights under an Executive Order known as Public Water Reserve No. 107, dated April 17, 1926 (“PWR No. 107”):

40E 63624-00, 40E 63636-00, 40E 63650-00, 40E 63668-00, 40E 63714-00, 40E 63728-00, 40E 63730-00, 40E 63737-00, 40E 63838-00, 40E 63854-00, 40E 63862-00, 40E 63886-00, 40E 63903-00, 40E 63939-00, 40E 63958-00, 40E 63990-00, 40E 64002-00, 40E 64014-00, 40E 64140-00, 40E 64172-00, 40E 64192-00, 40E 64197-00, 40E 64257-00, 40E 64296-00, 40E 64302-00, 40E 64305-00, 40E 64329-00, 40E 64331-00, 40E 64406-00, 40E 64409-00, 40E 64415-00, 40E 64908-00, 40E 65200-00, and 40E 65202-00

Each of these claims received the following issue remark:

THIS CLAIM IS BASED ON PUBLIC WATER RESERVE NO. 107 CREATED BY EXECUTIVE ORDER DATED APRIL 17, 1926. IT IS NOT CLEAR IF THIS CLAIMED RIGHT IS A FEDERAL RESERVED WATER RIGHT, BUT IF IT IS, IT IS NOT CLEAR WHETHER THE PURPOSE CLAIMED WAS CONTEMPLATED BY SUCH A RESERVATION, OR IF THE AMOUNT OF WATER CLAIMED IS THE AMOUNT NECESSARY TO FULFILL THE PURPOSE OF THE RESERVATION.

2. The United States’ Declaration clarifies that these claims are state-based “use” water rights that were mistakenly filed as reservations based on PWR No. 107. The Declaration states that the use rights were established by actions taken by the United States under the Taylor Grazing Act – specifically, the creation of grazing districts. Accordingly, the United States requests that these claims be converted from federal reserved water right claims to state-based “use” rights, and their priority dates be changed to the more junior date of when the United States created the grazing districts.

3. All of the above-referenced claims are located within the area encompassed by Montana Grazing District Nos. 1 and 2. Both grazing districts were established by July 11, 1935 Orders by the Secretary of the Interior, which were attached to the Declaration. The creation of the grazing districts is sufficient proof of intent to put water to beneficial use, and notice was published in the Federal Register. The essential elements of a state-base use claim are met, and the following corrections should be made to each claim:

~~Reserved Claim~~ **Statement of Claim**

Priority Date: ~~April 17, 1926~~ July 11, 1935

PRINCIPLES OF LAW

1. The Montana Water Court has the authority to determine the extent of all water rights in the state as they existed prior to July 1, 1973. *Fellows v. Saylor*, 2016 MT 45, ¶ 25, 382 Mont. 298.

2. A properly filed claim of an existing right or an amended claim of existing right is prima facie proof of its content. § 85-2-227, MCA. This prima facie proof may be contradicted and overcome by other evidence that proves, by a preponderance of the evidence, that the elements of the claim do not accurately reflect the beneficial use of the water right as it existed prior to July 1, 1973. This is the burden of proof for every assertion that a claim is incorrect. Rule 19, W.R.Adj.R.

3. Section 85-2-248(2), MCA, requires that the Water Court resolve all issue remarks that are not resolved through the objection process. *See also*, Rule 7, W.R.Adj.R. When resolving issue remarks, the Water Court must weigh the information resulting in the issue remark and the issue remark against the claimed water right. § 85-2-247(2), MCA. The factual evidence on which an issue remark is based must meet the preponderance of evidence standard before the prima facie status of a claim is overcome. 43Q 200996-00 et al., Order Establishing Volume and Order Closing Case, at 18, June 8, 2015.

CONCLUSIONS OF LAW

1. The Findings of Fact above are supported by a preponderance of the evidence. The United States has provided evidence sufficient to substantiate state-based use claims for its wildlife claims listed in Finding of Fact No. 1, above. The United States' requested modifications should be made.

2. The substantive issue remarks on the claims are resolved by the modifications described in the Findings of Fact above and information before the Court. The Notice Only Remarks have served their notice purpose and do not raise legal or factual issues for the Water Court to resolve. The issue remarks should be removed from the claims.

RECOMMENDATIONS

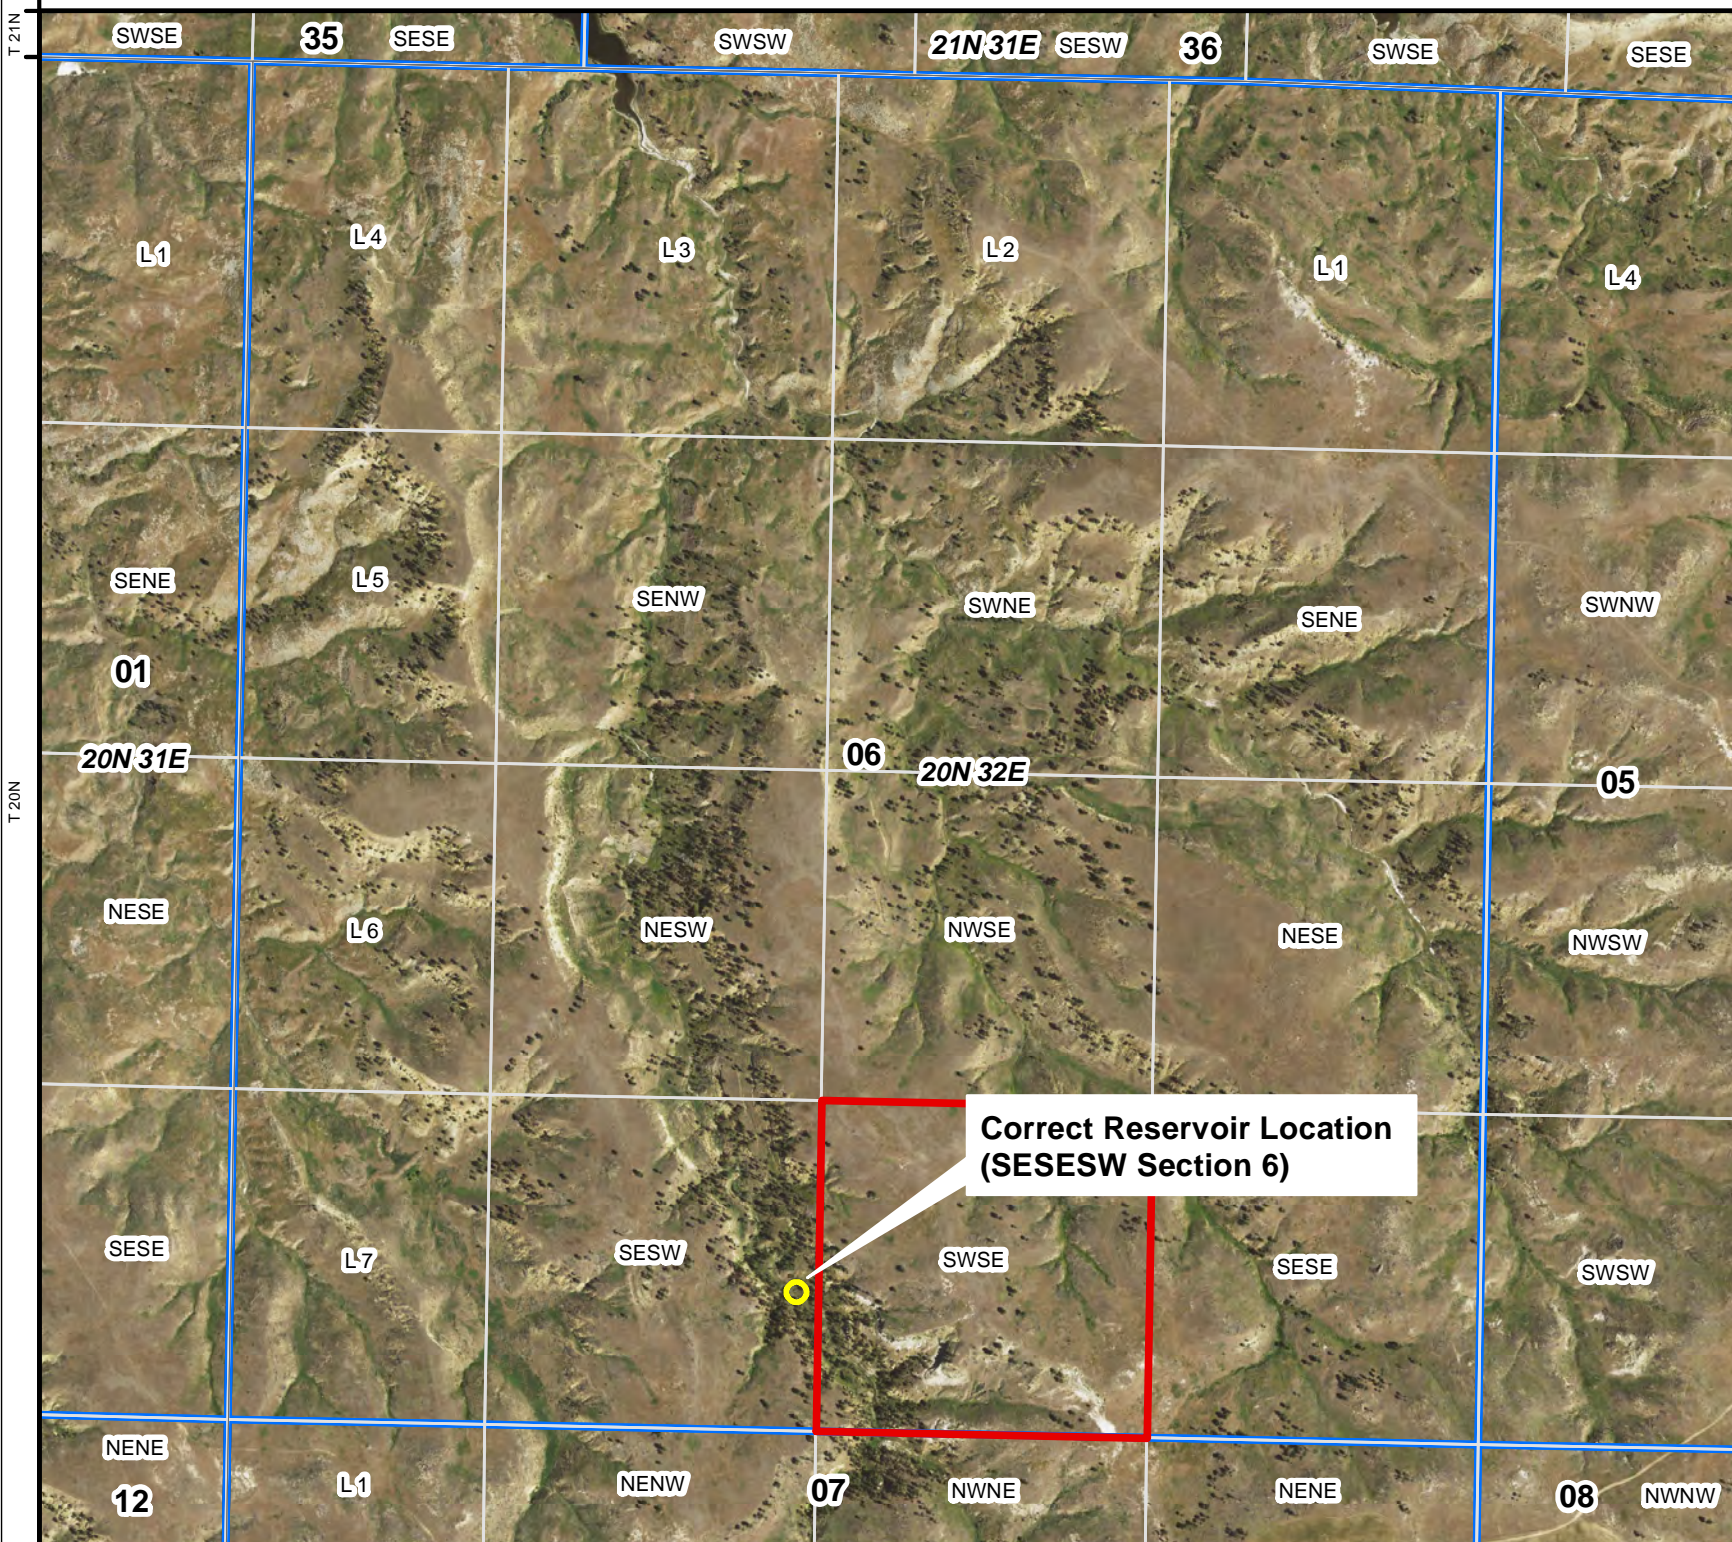

Based on the foregoing Findings of Fact and Conclusions of Law, this Master recommends that the Court modify the claims as described above.

A post-decree abstract of each water right claim reflecting the recommended changes is attached to this Report. Aerials or maps provided by the United States showing the United States' modified places of use and points of diversion are also attached.
